CS 2S03: Assignment Zero

Due on September 23, 2013

Dr. Jacques Carette

Idea

The goal of this assignment is to simply follow instructions. To the letter. No exceptions.

The Task

You are expected to submit exactly **ONE .zip** file.

This **.zip** file should be named **a0_⟨your student number here⟩**. e.g. a0_1234567.

This **.zip** file should contain exactly **TWO** files:

1. **ONE .txt** file
2. **ONE .java** file

The .txt file

The **.txt** file must be named **README.txt**. It should be plain text i.e. no tabs and no special characters. Windows/Linux formats are both ok.

It should be formatted as such:

```
Author: ⟨insert your name here⟩
ID: ⟨insert your student number here⟩
```

Make sure to delete the angle brackets.

The .java file

Attached to this document, you'll find the file **HelloWorld.java**.

You must **rename** this file to: **Hello⟨yourStudentNumber⟩.java**. e.g. *Hello1234567.java*.

Inside this renamed file, add your name and student number in the spaces provided making sure to remove the angled brackets.

Finally change the name of the *class* from HelloWorld to the same as the filename.

It should read, ***public class Hello⟨yourStudentNumber⟩***.
